Feature highlights

A single, continuous workflow closes the gap between disclosure and exploitation with full third-party coverage and AI-guided decision-making.

Close the Gap - From Days to Minutes

Detection, prioritization, remediation, and verification connect in one continuous workflow.

- ✓ Continuous vulnerability scanning across Windows, macOS, and Linux endpoints
- ✓ On-demand scans verify a remediation or assess a new CVE instantly
- ✓ Remediate 340+ third-party applications without leaving the workflow

One Workflow, Full Coverage

Vulnerability and patch management unify across the full estate from a single console.

- ✓ 900+ applications continuously scanned across Windows, macOS, and Linux
- ✓ Unified multi-OS patching with shared policies, dashboards, and reporting
- ✓ Audit-ready Patch Compliance Reports as a byproduct of operations

Guided Intelligence - N-zo Vulnerability & Patch Experts

Two AI experts turn senior-level security analysis into a single conversational prompt.

- ✓ Rank vulnerabilities by exploitability using CVSS, KEV, EPSS, and device context
- ✓ Get plain-language answers on environment impact for any CVE
- ✓ Receive failed-patch diagnostics with confidence-rated next steps

Close the gap.
Patch before attackers act.
