

Cove Data Protection™ for Google Workspace™

Cove Data Protection™ for Google Workspace™ is designed to safeguard organizations from data loss. It enables you to retain and restore essential business data stored in Google Workspace—all managed from the same web based dashboard used to protect servers, workstations, Microsoft 365, and critical business documents.

Protect Google Workspace from the same dashboard used for the rest of your environment

Save administrative time every day by checking status and managing backups in one place.

- ✓ Google Workspace tenants appear alongside your devices and Microsoft 365 tenants
- ✓ Google backup status is visible at a glance through dedicated Google columns in the multi-tenant dashboard
- ✓ The "Auto-add new users" toggle in the setup wizard automatically identifies and protects new users by default, so coverage keeps pace as the workforce grows

Retain Google Workspace data

Implement automated cloud-to-cloud backups of Google Workspace services.

- ✓ Protects Gmail, My Drive, shared drive content, Contacts and Calendar, so the data is there when you need it
- ✓ Runs on a default backup cadence of four- to six-hour cycles
- ✓ Retains Google Workspace data for up to seven years

Recover Google Workspace data

Respond to accidental or malicious deletions on your own terms, without waiting on Google support.

- ✓ Allows for granular recovery of emails, files, and folders if or when things go wrong
- ✓ Automatically parks data as an unlicensed archive when a Workspace user is deleted or loses their license, stopping seat billing while keeping historical data recoverable
- ✓ Provides Google Workspace domain history and statistics

Cove Data Protection™ for Google Workspace™

Cloud data storage included

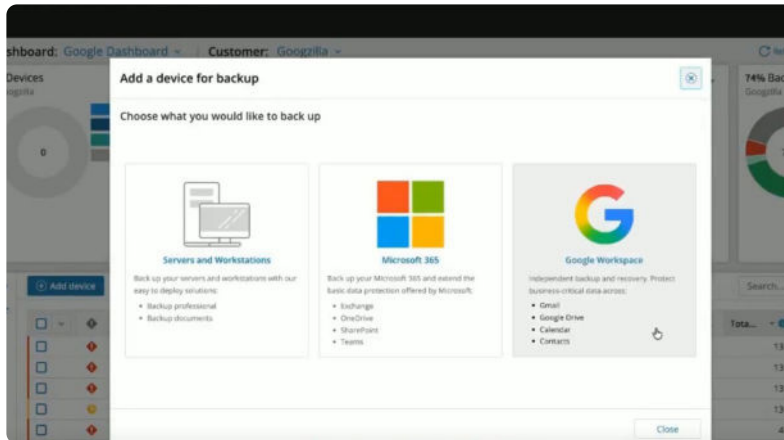

Keep your data in region without added cost.

- ✓ Cloud backup storage is included
- ✓ Backups are cloud-native by design: data is safeguarded with AES-256 encryption in transit and at rest, stored as immutable copies to protect against tampering and ransomware
- ✓ No storage quotas or throttling limits

Extend and modernize your data protection

Be ready to respond to data loss across every plan.

- ✓ Cove supports all Google Workspace editions and charges per protected user account, not per plan or per GB
- ✓ Helps budget with confidence as your organization grows

**Add Google
Workspace to your
Cove dashboard today.**
